27th March 2020

Dear valued customer,

I am contacting you to inform you that Electron Beam Processes has been issued with 'Key Worker' status as authorised by the Ministry of Defence.

As such EBP have put into place a series of operational continuity plans to ensure we have enough resources to keep our business running safely, and to enable us to continue to supply to our customers.

In the event of the Government taking further steps to restrict the movement of people and goods, EBP will remain able to operate due to our 'Key Worker' status.

If you have any issues with your current supply chain, or need any assistance with anything, especially in the manufacture or inspection of respirator equipment, please do not hesitate in contacting us.

We are here to help and support you all throughout these very challenging times.

Please use link attached to review our capabilities that you may not be aware of.
